Berufs- und Projekterfahrung

2/2026 – offen
remote

Senior Fullstack Developer
Kunde anonym
Development and design of management software for safety-critical systems

- Requirements analysis based on Domain-Driven Design

- Design and implementation of a clean architecture using feature slices

- Test-driven development

- Development of an AI user portal

- Design and implementation of microserverces and Blazor UI

2/2025 – 12/2025
remote

Prompt Engineer, Context Engineer, AI System Architect
Kunde anonym
Design and implementation of a secure, state-oriented AI system and multi-agent architecture for research-driven aerospace applications with strong emphasis on validation of AI-generated results.

- Development of state-oriented AI agents

- Orchestration of AI multi-agent systems

- Prompt & context modeling for reliable AI behavior

- Design of System-level AI architecture and orchestration

3/2020 – 9/2023
Penzberg

Testmanager
Roche
Design and creation of test procedures for software in the medical/laboratory sector in a highly regulated environment.

- Creation of test strategy and elaboration of the test methodology

- Realisation and evaluation of the test procedures

- Conception and implementation of a cross-technology test framework

- Responsible for the validation of systems in accordance with the health authorities

11/2017 – 2/2019
München

Senior Software Entwickler
ASM Assembly Systems
Design and Implementation of various RPC services for controlling material logistics workflows (PCB assembly robots).

- Developing a test strategy of cross-system tests

- Executing and reporting test plans

- Creation of cross-system executable runbooks

9/2015 – 12/2025
München

Senior Software-Entwickler
MAN Truck & Bus
Migrate operating software to .NET Core microservice/REST architecture. Responsible for ensuring code and product quality.

- Introduce CI/DI pipeline (Git-Jira-Jenkins)

- Implement various frameworks e.g. for unit/integration tests

- Coaching employees in the areas of design patterns/testing/code reviews

- Developing UI components with WPF, Razor/Blazor

- Design and implementation of backend components (ASP.NET Core)

- Backend integration of 3party REST services (ElasticSearch, RabbitMQ, Kibana, Amazon S3, Minio Object Storage)

10/2014 – 12/2015
München

Senior Software Entwickler
Kassenärztliche Vereinigung Bayerns
Creation of various operating software with a focus on WPF and MVVM

- Design and development of internal operating tools (WPF, MVVM)

- Design and development of server components (TDD)

- Development of add-ins for Word/Excel/Outlook

- Development of Linux components (Python)

- Development of document server components

- Design and maintenance of CI pipeline (Jenkins)

- Support for Linux document server

- Definition of test cases

- Unit/integration tests

- Bug reporting

1/2013 – 8/2014
München

Software Entwickler
Pixel
Development of a planning software for solar systems.

- UI design

- Porting code to support mobile devices

- Create test plan, execute system/integration/unit tests, test reporting

8/2010 – 12/2012
München

Senior Software Entwickler
Rohde & Schwarz
Development of a framework for software-defined radios (SDR).

- Definition of a DSL (domain-specific language) for SDR customisation

- Development of C++ code generators based on the DSL

- Development diagram generators of the generated code units (workflow)

10/2007 – 12/2009
Starnberg

Application Engineer
Pharmatechnik
Development of a workflow-driven POS application for the healthcare sector

- Creation of requirements with the specialist department using our own DSL

- Code generation using our own code generators (DDD approach)

- Implementation of business logic

- Creation of unit tests using our own code generators (DDD approach)

- Execution and evaluation of regression test results
