Principal Software Engineer | .NET Architecture | AI-Assisted Delivery

Profile: Principal software engineer with extensive experience in software development, .NET delivery, architecture and software quality. Combines hands-on development with cross-team technical direction and production ownership. Recently designed and introduced coding-agent workflows for DDD-based requirements, implementation and review. Experienced in ADRs, CI/CD quality gates, regulated validation and coaching teams toward maintainable delivery.

Name: Stefan Busch
Address: Østerbyvej 54, 6470 Sydals
Work permit: European Union

Professional experience (excerpt)

2/2026 – present, remote
Senior Full-Stack Developer
Confidential client
Designing management software for safety-critical systems using DDD, feature-sliced Clean Architecture, TDD and Blazor.

2/2025 – 12/2025, remote
Prompt Engineer, Context Engineer, AI System Architect
Confidential aerospace and defence research client · Freelance
Design and implementation of a secure, state-oriented AI system and multi-agent architecture for research-driven aerospace applications with strong emphasis on validation of AI-generated results.
- Applied coding agents to DDD-based requirements analysis, implementation, defect resolution and architectural review
- Established GitHub CI/CD quality gates with Docker for build, testing, prerelease, publishing and production release

9/2015 – 12/2025, München
Senior Software Developer / Architect
MAN Truck & Bus
Directed cross-team architecture and production delivery of .NET Core REST services.
- Recorded architecture decisions in ADRs and established independently deployable service boundaries based on SRP
- Introduced agent-assisted engineering for requirements, implementation, fixes and review
- Combined hands-on delivery and operation with coaching in patterns, testing and code reviews

3/2020 – 9/2023 | Penzberg
Test Manager
Roche
Led CI/CD and validation for regulated, internally hosted REST services.
- Created GitHub Actions and Docker workflows for reproducible build, testing and release
- Established traceable, FDA-aligned validation and cross-technology test automation

11/2017 – 2/2019 | München
Senior Software Developer
ASM Assembly Systems
Built RPC services and cross-system test automation for PCB material logistics.

10/2014 – 12/2015 | München
Senior Software Developer
Kassenärztliche Vereinigung Bayerns
Built a test-driven server-side toolchain for healthcare billing workflows.

1/2013 – 8/2014 | München
Software Developer
Pixel
Built mobile-friendly solar-planning software with unit, integration and system-level quality assurance.

8/2010 – 12/2012 | München
Senior Software Developer
Rohde & Schwarz
Built an extensible SDR framework using a domain-specific language and C++ code generation.

Education

1990 | Diploma (Dipl Ing. technical physics)

1986 | High School Diploma

1985 | Military Service (Luftlande-Lehr- und Versuchskompanie 909)

1984 | Journeyman's certificate: central heating and ventilation engineer

Other

since 2005 | Trainer in adult dance sport: standard-latin

since 2015 | Table tennis coach for young people

Language skills

German | C2

English | C1

Danish | A1
