SUMMARY

Senior Software Developer and Architect with 20+ years of experience in .NET modernisation, asynchronous and parallel processing, and enterprise database integration. Combines healthcare software validation with practical use of AI agents in the SDLC to support reliable, maintainable applications.

KEY ACHIEVEMENTS

- Evolved a modular enterprise platform covering 100+ modules and migrated legacy components to .NET Core.
- Built cross-technology test automation for regulated medical and laboratory software at Roche.
- Designed state-oriented multi-agent systems with systematic validation of generated results.

SELECTED FREELANCE WORK EXPERIENCE

04/2026 – present **Confidential client**

Senior Fullstack Developer

Management software for safety-critical systems: microservices, a Blazor UI and an AI user portal.

- Applied DDD, Clean Architecture with feature slices and TDD to structure implementation.
- Used AI agents for implementation, testing and code reviews; systematically checked generated results.

09/2015 – 12/2025 **MAN Truck & Bus, Munich**

Senior Software Developer / Software Architect

Modernised enterprise applications into a modular .NET Core platform; the overall engagement covered 100+ modules.

- Migrated legacy components to REST-based services; integrated Oracle and PostgreSQL through Entity Framework Core.
- Applied async/await, TPL and performance tuning to existing .NET components.
- Established CI/CD and automated testing; aligned standards through architecture reviews and coaching.
- Used AI agents for implementation, testing and code reviews, with systematic result checks.

01/2013 – 08/2014 **Pixel, Munich**

Senior Software Developer

Developed WPF/MVVM planning software and service-layer business logic; built a validation framework and performed unit, integration and system tests.

05/2011 – 12/2012 **Rohde & Schwarz, Munich**

Senior Software Developer

Developed a DSL, C++ code generators and workflow visualisation tools for software-defined radio systems.

01/2010 – 06/2010 **T-Systems International, Munich**

Software Developer

Automated BizTalk deployments with hundreds of artefacts across approximately 50 environments; performed integration tests.

SELECTED CONSULTING PROJECTS

Selected consulting projects carried out alongside other freelance engagements.

10/2025 – 03/2026 **Confidential client — aerospace research, Germany**

AI System Architect, Prompt Engineer, Context Engineer

Designed state-oriented agents and multi-agent orchestration with validation of generated results.

- Used AI agents in the SDLC for implementation, testing and code reviews; checked results systematically.
- Stack: Ollama, .NET 10, Blazor and Python.

03/2020 – 09/2023 **Roche, Penzberg**

Test Manager / Senior Software Developer

Developed test and validation strategies for medical and laboratory software in a regulated environment.

- Implemented a cross-technology test framework and Selenium automation to improve regression stability.
- Applied async/await, TPL and performance tuning; supported FDA-aligned system validation.

01/2020 – 02/2020 **Dynamic Biosensors, Martinsried**

Application Architect

Evolved a microbiological measurement platform: async/await, TPL, performance tuning and refactoring.

- Designed EventStore-based persistence and trained the team in SOLID and test methodology.

11/2017 – 02/2019 **ASM Assembly Systems, Munich**

Senior Software Developer, QA Manager

Developed WCF/REST services for material logistics; used SQL Server and defined cross-system tests and executable runbooks.

MORE PROJECTS

SKILLS

Development & Data	Architecture & AI	Quality & Collaboration
C# · .NET / .NET Core	Legacy modernisation · REST	TDD · Unit / integration tests
.NET Framework · ASP.NET Core	Microservices · DDD	Selenium · Regression testing
async/await · TPL	Clean Architecture · SOLID	FDA-aligned validation
Multithreading · Performance tuning	Agentic AI in the SDLC	CI/CD · Git · Jenkins
Oracle · SQL Server · PostgreSQL	Multi-agent orchestration	Architecture / code reviews
Entity Framework / EF Core	Prompt / context engineering	Coaching · Knowledge sharing

EDUCATION

10/1985 – 08/1990 **Diploma** in Technical Physics, FH Munich

10/1981 – 05/1984 **Journeyman's certificate**, Central Heating & Ventilation Engineering

LANGUAGES

German	English	Danish
C2	C1	A1 (ongoing studies at UCplus Danish Language School)
