Application for the position as Test Manager at Saab Danmark A/S

Dear Hiring Team,

I am applying for the position of **Test Manager** at Saab Danmark A/S because I am deeply motivated by your mission of keeping people and society safe. Years ago, I worked for **Rohde & Schwarz** in the field of **software-defined radios**. During a conversation with your colleagues at the last „Zuzügler Messe“ in Nordborg, I learned about your communication solution TactiCall. I was immediately fascinated by the topic again.

Living now in Southern Denmark and with many years of experience in software development and test management in highly regulated environments, I see a strong alignment between my professional background and your requirements.

During my role as **Test Manager** at **Roche**, our team was responsible for designing and implementing test strategies in the medical and laboratory sector – a field that, like defence, demands precision, compliance, and uncompromising quality standards. I developed cross-technology test frameworks, coordinated acceptance tests, and ensured system validation according to strict regulatory requirements. These experiences may directly match your need for a structured, detail-oriented Test Manager with strong analytical skills.

At **MAN Truck & Bus**, I worked as a **Senior Software Developer and Architect**, where I introduced CI/CD pipelines, implemented test frameworks, and coached colleagues in design patterns and code reviews. Because I have coordinated system integration tests and collaborated with international teams, I was able to build extensive expertise that could be highly valuable in Saab’s complex and global project environment.

I value **respectful collaboration** and believe that successful projects are built on **strong teamwork**. I enjoy **sharing knowledge** with colleagues, learning from their perspectives, and continuously **developing my own skills**. By staying up to date with new technologies, I can contribute effectively to dynamic requirements. Within interdisciplinary teams, I always striving to create an open and constructive working environment where mutual respect leads to the best outcomes.

What excites me most about Saab Danmark A/S is your international and innovative environment combined with the strong mission-driven culture. With my technical background and my experience in test management, and motivation to contribute to safety-critical solutions, I am confident that I can support Saab’s growth and success.

I would welcome the opportunity to further discuss how my skills and experience can benefit your team. Thank you for considering my application.

Yours sincerely,
Stefan Busch
